City Hospital - Department of Pulmonology

Consultation & Discharge Summary

Patient: Sarah Johnson DOB: 1988-04-12 (F) MRN: SJ-004812
Date of visit: 2026-05-18 Physician: Dr. Peter Novak (Pulmonology)

Reason for visit

Scheduled asthma review. No acute respiratory complaints.

History

Known asthma since 2015, managed with salbutamol as needed. Reports good day-to-day control, rare nocturnal symptoms, no recent exacerbations or courses of oral steroids. Known penicillin allergy (rash).

Examination

Chest clear on auscultation, no wheeze. SpO2 98% on room air.
Blood pressure 128/82 mmHg. Peak flow at personal best.

Assessment

Asthma - well controlled. Hypertension - stable on current therapy.

Plan

Continue salbutamol as needed; reinforce inhaler technique. Routine follow-up in 6 months, sooner if symptoms worsen.
